

Shopify App Telemetry

Your Store Isn't Slow. Your Apps Are.

See exactly which apps are hurting your performance... and what to do about it.

If your store feels slow, you don't have a speed problem. It's an app problem. Most Shopify stores have no visibility into how apps impact performance.

We fix that.

Sound Familiar?

- Store feels slower than it should
- Too many apps installed
- Not sure what's slowing you down
- Apps overlapping or conflicting
- Speed tools don't show the cause

What App Telemetry Reveals

App Impact

Load Analysis

Conflict Detection

Duplicate Detection

Health Score

Code Cleanup

What's Actually Broken

Apps → Scripts → Load Time → Conversion

This is where you lose revenue.

- Slow pages → **lost conversions**
- App conflicts → **broken experiences**
- Leftover code → **unnecessary load**

We show you exactly what's wrong and fix it.

What Changes After

- ✓ **You Identify Bottlenecks**
See exactly which apps impact speed.
- ✓ **You Eliminate App Bloat**
Remove duplicate and unnecessary tools.
- ✓ **You Fix Conflicts**
Stop apps from interfering with each other.
- ✓ **You Clean Up Your Store**
Remove leftover code from old apps.
- ✓ **You Improve Performance**
Faster load times = better conversion.

If your store feels slow, your apps are already costing you.

Let's fix it.
